

# Unified Communications

## *Enabling Mobile & Flexible Working*

In the modern business world there are ever increasing pressures to not only offer more flexible working conditions, but also the pressure to be in an always-on environment, and to never miss a call from colleagues, customers and prospects.

The ONE Voice mobility solution includes apps for iPhone and Android phones and tablets that are integrated with your Cable ONE Business Hosted Voice service to deliver an exceptional user experience. From directory integration to voice and video calling to conferencing and collaboration, these apps allow mobile employees to communicate as though they are in the office.

By providing a single number for all employees' communication, the solution ensures that no call is never missed and that outgoing calls deliver your business caller ID maintaining a professional image. The solution supports the BYOD trend allowing employees to use a personal mobile phone and ensuring that all calls stay on the business network.

Mobility is not just for road warriors and execs anymore. People across all parts of your business are using mobile devices whether they are working from home, temporarily out of the office, at a customer site, or even when they are in the office.

Almost everyone is a mobile employee and with the bring-your-own-device (BYOD) movement this trend is only going to get stronger. According to a recent Frost and Sullivan survey, 66% of respondents said that mobile phones are their most popular endpoint, even more so than traditional desk phones

## **MAINTAIN A PROFESSIONAL BUSINESS IMAGE**

Your employees can use one number for all incoming and outgoing calls with our mobile apps. This makes it simple for customers and prospects to reach your employees, with only one number to remember. Also, when you make calls, your business caller ID is displayed ensuring that you present a professional image. Also with corporate directory integration it's easy to stay in touch with colleagues and customers.

## **KEY BENEFITS**

- Access your corporate/personal directory to easily reach colleagues, customers, and prospects
- See and listen to your voice messages
- Never miss returning an important call
- Manage your phone service with access to call settings

*Ensure you will never miss an important business call and be more productive by enabling flexible working.*
